Notes:

- Data contained within this report is rapidly evolving due to increase in demand and global supply chain disruptions.
- Issued last 7 days did not always meet volume ordered / requested by users.
- Weeks of Supply (Highest Issued Weekly) is a measure to identify stock run down estimates during high demand periods and relevant weeks of supply holdings.

Weeks of Supply Red = < 8 weeks = Short Supply

Amber = 8-16 Weeks = Risk of Supply

Green = > 16 Weeks = Limited Risk to supply

Placed Orders Red = Low confidence/assurance in supply continuity

Amber = Medium confidence/assurance in supply continuity

Green = High confidence/assurance in supply continuity
