

Western Australian Coding Rule

0719/21 Removal of testicular prosthesis

WA Coding Rule 0810/05 *Removal of testicular prosthesis* is retired.

In ICD-10-AM/ACHI/ACS Ninth Edition (effective 1 July 2015) an ACHI Index pathway was created for removal of testicular prosthesis. This change was inadvertently missed in the 2018 review of WA Coding Rules.

DECISION

WA Coding Rule 0810/05 *Removal of testicular prosthesis* is retired.

[Effective 1 Jul 2015, ICD-10-AM/ACHI/ACS 9th Ed.]

Western Australian Coding Rule

0810/05 Removal of testicular prosthesis

Q.
What is the correct procedure code assignment for removal of testicular prosthesis?

A.

Assign 37604-00 [1172] *Exploration of scrotal contents, unilateral* by following Index pathway:
Incision
- scrotum.

DECISION

Assign 37604-00 [1172] *Exploration of scrotal contents, unilateral* for removal of testicular prosthesis.

[Effective 18 August 2010, ICD-10-AM/ACHI/ACS 7th Ed.]
