

Injury & Trauma - Prevention, Management and Rehabilitation Courses for WA Health Practitioners Audit Report 2012-16 **Part A: Prevention Courses**

Prepared by the Injury and Trauma Health Network affiliated -
Western Australian Trauma Education Committee (WATEC)

Government of **Western Australia**
Department of **Health**

Background – Part A: Prevention Courses

The principal goal of the Injury and Trauma Health Network community of practice is to advise on the development of population-centred, sustainable and effective clinical services across all continuums of care.

The responsibilities of the Injury & Trauma Health Network (I&THN) Community of Practice are to absorb those activities formally allocated to the Executive Advisory Group (EAG) outlined within the Terms of Reference (2008). That is to:

- Develop and implement a state-wide policy framework for injury prevention and trauma services.
- Develop appropriate models of care to strive for equitable access to services.
- Provide advice on health priorities, goals and targets that relate to injury prevention and trauma treatment and management in WA.
- Provide advice and support in the development of policies that support integration of services through partnerships and collaborations across organisations and government service providers.
- Advise on appropriate evidenced-based standards of care including benchmarks, accreditation and credentialing.
- Advise on workforce needs and the education and training required by clinicians and other relevant professions and the community.
- Advise on the development of injury surveillance and trauma research data systems to inform planning, policy and strategy.
- Ensure the production of an annual report that is made available to the public.

In keeping with several of the responsibilities it was decided that a web based directory of WA Trauma Education opportunities would be a useful tool for those interested in or responsible for facilitating professional development.

To this end the community supported by the WA Trauma Education Committee (WATEC), a sub-group of the Injury and Trauma Health Network, conducted a WA Trauma Education Audit which informed this directory, now known as the:

Injury & Trauma - Prevention, Management and Rehabilitation Courses for WA Health Practitioners Audit Report.

This document **Part A: Prevention Courses** is only a portion of the entire directory.

The report is available in full or as sub sections on the Injury and Trauma Health Network website

http://www.healthnetworks.health.wa.gov.au/projects/trauma_education.cfm

The other sections available as separate documents are:

Part B: Treatment Courses

Part C: Rehabilitation Courses

Invitation to all interested providers

The audit in full and this section 'Prevention courses' is by no means an exhaustive list of all available trauma education. However, it does provide direction to a wide variety of professional development opportunities available to West Australians. If you would like to have your organisations education courses considered for possible inclusion in the audit as part of an annual update simply submit the details, including a contact persons phone number or email address to

healthpolicy@health.wa.gov.au; attention Injury and Trauma Health Network Development Officer, Trauma Education Directory.

Department of Commerce WorkSafe SmartMove		
Website: http://www.worksafe.wa.gov.au/smartmove/about.htm		
Target Audience	Content	Contacts
<p>WorkSafe SmartMove is designed for students in year's ten to twelve to make you a little more aware of what can happen in the workplace. It will give you a chance to learn about the potential dangers of the workplace but also your rights and responsibilities.</p>	<p>At WorkSafe, we want young people to know about occupational safety and health (OSH). Lack of experience and skills combined with a desire to work hard and impress people can make you pretty vulnerable and much more likely to be hurt. The reason we've designed WorkSafe SmartMove is to help stop young people being injured and killed every year at work.</p> <p>WorkSafe SmartMove will give you the knowledge you need to stay safe in the workplace.</p> <p>You can work through the activities in WorkSafe SmartMove either on or offline, in class or at home in preparation for your initial work experiences. This work will prepare you for the multiple choice quiz that, if passed, will provide you with your first OSH certificate.</p> <p>Start with the general module and then pick the module for the industry in which you will be working.</p>	<p>On line</p>

Exercise Medicine Australia: **Stay On Your Feet® Tai Chi for Health and Falls Prevention Program**

Website: www.exercisemedicine.com.au

<p>Target Audience</p> <p>General population over 50 and special population groups with limited balance and mobility</p>	<p>Content</p> <p>The Tai Chi for Health and Falls Prevention Program has been officially assessed and approved by Australian Physiotherapy Association and Fitness Australia as a national falls prevention accreditation training program for physiotherapists, physical activity leaders, exercise instructors and other health professionals, community health workers and volunteers involved in falls prevention and promotion of active and healthy ageing.</p> <p>Jointly developed Professor Fred Ehrlich, a specialist in geriatrics from the Faculty of Medicine, the University of New South Wales; Alice L. Yuan, a leading international Tai Chi authority with Exercise Medicine Australia; and Dr Henry Zheng, a research fellow with the Faculty of Health, the Queensland University of Technology, the Tai Chi for Health and Falls Prevention Program is an evidence-based, safe and targeted Tai Chi intervention Program designed to strengthen postural control muscles and knee and ankle extensors; overcome lower limb weakness; improve mobility, flexibility, coordination, dynamic balance and postural control strategies; improve proprioception, toe clearance, gait and reaction time; maintain bone density and reduce the risk of bone fracture; build confidence and overcome the fear of falling. The specially designed Tai Chi intervention program also incorporates chair-based movements designed for special population groups with limited balance, mobility or motor impairments.</p> <p>This step-by-step teaching and practice workshop is designed for falls prevention leaders, physiotherapists, exercise instructors and other health professionals, community health workers and volunteers at all levels to learn, practice and be able to deliver the evidence-based and targeted Tai Chi intervention program for falls prevention and health improvement at community and residential settings. No pre Tai Chi knowledge or experience is required. Exercise Medicine Australia also provides tailored training for the national falls prevention program for health departments, local councils and community health centres.</p>	<p>Contacts</p> <p>Exercise Medicine Australia Address: 240 / 303 Castlereagh St, Sydney 2000 Australia Tel:(02) 92818868 Web: www.exercisemedicine.com.au Email: service@exercisemedicine.com.au</p>

Farmsafe WA Alliance **Child Safety Workshops**

Website: <http://www.farmsafewa.org>

<p>Target Audience</p> <p>Farmsafe WA Alliance is a not-for-profit community based organisation whose members are farmers, community organisations and individuals who promote awareness and education of farm safety.</p>	<p>Content</p> <p>Farmsafe WA Alliance is often involved in delivering child safety workshops to parents, community nurses and other interested people. We have recently had the opportunity to provide information through collaborative child safety workshops with Kidsafe WA and Royal Life Saving Society. These workshops have been catered to a variety of audiences and covers child safety on farms, in the home, on the road, in the playground and around water. We have also had the opportunity to present child safety on farms workshops thanks to sponsorship from Partners in Grain and Grain Pool - with some child first aid also being covered by St John Ambulance.</p>	<p>Contacts</p> <p>On Line</p>
---	---	---------------------------------------

Farmsafe WA Alliance **Emergency Care in the Bush**

Website: <http://www.farmsafewa.org>

Target Audience	Content	Contacts
<p>Are you prepared for a medical emergency on your farm or station?</p>	<p>We are currently coordinating a project funded by the Department of Local Government and Regional Development to assist farmers and station managers/owners with the information and basic skills for emergency preparedness.</p> <p>Organisations such as FESA and St John Ambulance will be involved to ensure that relevant and practical information will be provided. We are currently seeking expressions of interest to run a workshop in your region.</p> <p>The workshops will cover topics such as:</p> <ul style="list-style-type: none"> ▪ Emergency planning and preparedness ▪ Who to call in a medical emergency ▪ The role of each emergency service ▪ Basic skills and what to do in an emergency <p>The workshop should take approximately 3 hours.</p>	<p>On line</p>

Farmsafe WA Alliance **Farm Safety Course - Managing Farm Safety**

Website: <http://www.farmsafewa.org>

Target Audience	Content	Contacts
<p>Farmers, small business owners.</p>	<p>The Managing Farm Safety one-day workshops are practical, hands on programme for delivery of current best practice management for farm health and safety. The workshops assist farmers from all types of enterprise to develop skills and management tools to meet their legal requirements and productivity goals. Knowing and understanding the Occupational Health and Safety (OH&S) laws will help to avoid unnecessary costs and damage to your business caused by workplace injury and illness. The course includes;</p> <ul style="list-style-type: none"> ▪ A combination of theory and practical activities ▪ Can be conducted on-farm (discount applies for host farmer) ▪ Is suitable for both men and women ▪ Provides participants with accredited training farm health and safety management (nationally accredited certificate provided on completion of the course) ▪ Participants are provided with a resource for on-farm use <p>Workshop participants receive a comprehensive resource package and may be eligible for substantial discounts on workers compensation insurance premiums.</p>	<p>On line</p>

Farmsafe WA Alliance **Mature Farmers Workshop**

Website: <http://www.farmsafewa.org>

Target Audience	Content	Contacts
<p>The target group for the programme is farmers over the age of around 55 years.</p>	<p>The Making Farm Work Easier as We Get Older workshop programme aims to:</p> <ul style="list-style-type: none"> ▪ Help older farmers to acknowledge the ageing process and its impact on their work life on their farm or property ▪ Help farmers to understand a little more about the common effects of the ageing process on physical and mental processes ▪ Help farmers to identify the jobs that are getting harder for them to because of the ageing process ▪ Help older farmers to take action to achieve two outcomes: <ul style="list-style-type: none"> ▫ To make the older person fit for the job; ▫ To make the job fit for the older person <p>The Older Farmers who have devised and steered this programme have been firm that the programme will be effective only if farmers are assisted to think through their recent farm work and life experiences, in the context of helping them achieve their own goals at this stage of their life.</p> <p>The Workshop is NOT about Occupational Health and Safety, although if older farmers take the desired action the ultimate result will be improved safety on their farmers for themselves and others.</p>	<p>On line</p>

Farmsafe WA Alliance Personal Health and Safety Website: http://www.farmsafewa.org		
Target Audience People working or living on farms, and for those who manage or work in other agricultural enterprises, such as orchards, market gardens, vineyards and plant nurseries.	Content The Farm Safety series has been produced by Aghealth Australia and cover different aspects of farm safety. Farm employers can use these fact sheets as part of the induction training programme of new employees. Induction should include sufficient information, training and supervision to enable workers to do their work without risk of injury or harm. The following resources provide information on farm health and injury to: <ul style="list-style-type: none"> ▪ Assist health workers in their everyday interactions with farmers ▪ Support the development of local health programmes inclusive of farmers health and safety needs Click on the following resource or page links: Farm Health and Safety Toolkit for Rural General Practitioners Farm Health and Injury Chartbook Series	Contacts On line
Kidsafe WA Fact Sheets Website: http://www.kidsafewa.com.au		
Target Audience Kidsafe is the leading Australian, non-government, not-for-profit charitable organisation dedicated to preventing unintentional childhood injuries.	Content Kidsafe WA has an extensive list of Injury Prevention Fact Sheets online and in print.	Contacts On line

Kidsafe WA Home Safety Website: http://www.kidsafewa.com.au		
Target Audience Community	Content The Home Safety Section looks at information and programs on how to keep children safe in and around your home. School Drug Education and Road Aware **Smart Steps: Engaging Parents and Children in Road Safety**

Website: <http://www.sdera.wa.edu.au>

Target Audience	Content	Contacts
<p>Staff who work with Kindergarten to Year 3 students.</p>	<p>Smart Steps aims to promote parent and community involvement in road safety education and improve road safety outcomes for children aged 0 – 4 years.</p> <p>Smart Steps is a parent and carer education program regarding the use of:</p> <ul style="list-style-type: none"> ▪ child car restraints and general passenger safety ▪ safe pedestrian practices ▪ safe places to play <p><i>Smart Steps Workshop</i> is a great precursor to the <i>Challenges and Choices</i> early childhood workshop. Participants will look at issues around passenger, pedestrian and play safety for young children; gain a deeper understanding of what influences positive road safety attitudes and behaviour change; look at ways to implement road safety information sessions for parents; and unpack the <i>Smart Steps</i> resource.</p>	<p>On line</p>

<p>School Drug Education and Road Aware Challenges and Choices - Resilience, Drug and Road Safety Education Website: http://www.sdera.wa.edu.au</p>		
<p>Target Audience School based staff working with Kindergarten to Year 7 students.</p>	<p>Content Road safety education for Kindergarten to Year 10 students is the focus of Challenges and Choices resources and professional learning workshops. Road safety issues such as passenger, pedestrian and riding safety are covered through a range of interactive activities and with a focus on developing self-management and interpersonal skills. Decision-making, problem-predicting and problem-solving will give young people the skills to make safer decisions in and around traffic. This workshop will provide participants with an understanding of effective resilience, drug and road safety education, three contexts identified in the K-10 Health and Physical Education Syllabus. A range of activities and teaching and learning strategies from the <i>Challenges and Choices</i> resources, which can easily be transferred into the classroom, will be modelled throughout the workshop.</p>	<p>Contacts On line</p>
<p>School Drug Education and Road Aware Keys for Life Pre-Driver Workshop Website: http://www.sdera.wa.edu.au</p>		
<p>Target Audience School based staff working with Year 10-12 students.</p>	<p>Content This workshop focuses on young driver issues; the WA Licensing System and developing students' self-management skills in traffic-related situations. It unpacks the <i>Keys for Life</i> resource and gives participants a range of activities and strategies; an understanding of how to administer the Learner's Permit Test at school; and information on accessing a <i>Keys for Life</i> one-hour workshop for parents and young people, offered by the RAC. <i>Keys for Life</i> can also be offered as a Curriculum Council endorsed program that counts as one point towards the WACE.</p>	<p>Contacts On line</p>

<p>School Drug Education and Road Aware Keys for Life Parent Workshop Website: http://www.sdera.wa.edu.au</p>		
<p>Target Audience This is a free, school community-based initiative for young people and their parents/carers that promotes the importance of supervised driving practice for learner drivers.</p>	<p>Content The 1 hour interactive session provides parents/carers and the learner driver with the importance of getting as much supervised driving practice as possible ways to communicate to take the stress out of driving practice Students who help to organise and run a <i>Keys for Life</i> parent workshop can accumulate hours towards their compulsory 20 hours of community service. Schools can contact the RAC in the metropolitan area or RoadWise and SDERA Regional Project Officers to facilitate the session.</p>	<p>Contacts On line</p>
<p>School Drug Education and Road Aware Getting it Together: A Whole-School Approach to Road Safety Education Website: http://www.sdera.wa.edu.au</p>		
<p>Target Audience For Primary and Secondary School Staff.</p>	<p>Content This workshop unpacks the Getting it Together resource which outlines an effective model for school road safety education that can be used to assess, plan and implement strategies. It provides participants with an understanding of best practice principles in road safety education; the issues for children and young people; road safety curriculum resources already in schools; and links schools to support agencies.</p>	<p>Contacts On line</p>
<p>School Drug Education and Road Aware Getting it Together: A Whole-School Approach to Drug Education Website: http://www.sdera.wa.edu.au</p>		
<p>Target Audience For Primary and Secondary School Staff.</p>	<p>Content This workshop unpacks the new resource <i>Getting it Together</i> which outlines an effective model for best practice in school drug education; considers how to develop School Drug Education Guidelines and procedures for managing drug use incidents and providing support interventions to students. Participants will gain an understanding of how to assess, plan and implement effective drug education and to link with community based services that provide support to schools' drug education initiatives.</p>	<p>Contacts On line</p>

School Drug Education and Road Aware **Health Education Made Easy**

Website: <http://www.sdera.wa.edu.au>

<p>Target Audience</p> <p>School based staff working with Year 8 to 10 students.</p>	<p>Content</p> <p>This workshop looks at drug and road safety issues for young people. It unpacks the <i>Challenges and Choices: Early Adolescence Resource for Resilience, Drug and Road Safety Education</i> which has specific content linked to the K-10 Health and Physical Education Syllabus and the Curriculum Framework Health and Physical Education Learning Area Outcomes. Participants will walk away with a range of activities and teaching strategies that can be transferred into their classroom and health programs.</p>	<p>Contacts</p> <p>On line</p>
---	--	---------------------------------------

School Drug Education and Road Aware **Child Car Restraint Fitting Course**

Website: <http://www.sdera.wa.edu.au>

<p>Target Audience</p>	<p>Content</p> <p>RoadWise conduct a Type 1 Child Car Restraint Fitting Course which aims to provide participants with the knowledge and skills to competently fit child car restraints in vehicles and to become part of a state-wide network of qualified and approved Type 1 Fitters.</p>	<p>Contacts</p> <p>The courses are scheduled at various times throughout the state. To find out more phone (08) 9213 2066 or refer to the RoadWise website http://www.det.wa.edu.au/sdera/detcms/navigation/for-parents/road-safety-education/?page=1#toc3</p>
-------------------------------	---	---

<p>School Drug Education and Road Aware Keeping in Touch : Working with Alcohol and Other Drug Use Website: http://www.sdera.wa.edu.au</p>		
<p>Target Audience Secondary school based staff.</p>	<p>Content This two day workshop offers school-based staff an opportunity to increase their awareness around drug use issues and how these may impact young people. It introduces and provides opportunity to practise using models and frameworks for responding appropriately and supporting students through brief interventions. Support pathways guiding the management of drug use issues within the school and beyond will also be considered. This workshop is supported by the resources Keeping in touch (the kit) – Working with Alcohol and Other Drug Use, A resource for Primary and Secondary Schools.</p>	<p>Contacts On Line</p>
<p>School Drug Education and Road Aware Alcohol, Cannabis and Other Drugs Website: http://www.sdera.wa.edu.au</p>		
<p>Target Audience Upper Primary and Secondary School Staff.</p>	<p>Content This workshop provides up-to-date information on alcohol, cannabis and other drugs with an opportunity to explore a range of resources including Challenges and Choices: Early Adolescence resource for resilience, drug education and road safety; Rethinking Drinking; and Cannabis and Consequences. This workshop clarifies the 'real picture' of student drug use and considers best practice in school drug education.</p>	<p>Contacts On Line</p>
<p>School Drug Education and Road Aware SDERA Professional Learning Seminars Website: http://www.sdera.wa.edu.au</p>		
<p>Target Audience School based staff working with Kindergarten to Year 12 students.</p>	<p>Content Seminars give participants the opportunity to hear guest speaker present information on resilience, drug education and road safety topics. Resources related to these topics will be showcased. The seminar commences at 4.30pm with presentations usually finishing around 6.00pm. A complimentary dinner gives participants a chance to network with other professionals.</p>	<p>Contacts On Line</p>

The George Institute Falls Prevention in the Older Person Website: http://www.thegeorgeinstitute.org		
Target Audience The George Institute for International Health seeks to improve global health through undertaking high quality research, and applying this research to health policy and practice.	Content One-semester online unit teaches students about the principles of falls prevention and falls injury prevention in the older person with a focus on the practical application of these principles.	Contacts On line
