

Injury & Trauma - Prevention, Management and Rehabilitation Courses for WA Health Practitioners Audit Report 2012-16

Part B: Treatment Courses

Prepared by the Injury and Trauma Health Network affiliated -
Western Australian Trauma Education Committee (WATEC)

Government of **Western Australia**
Department of **Health**

Background – Part B: Treatment Courses

The principal goal of the Injury and Trauma Health Network community of practice is to advise on the development of population-centred, sustainable and effective clinical services across all continuums of care.

The responsibilities of the Injury & Trauma Health Network (I&THN) Community of Practice are to absorb those activities formally allocated to the Executive Advisory Group (EAG) outlined within the Terms of Reference (2008). That is to:

- Develop and implement a state-wide policy framework for injury prevention and trauma services.
- Develop appropriate models of care to strive for equitable access to services.
- Provide advice on health priorities, goals and targets that relate to injury prevention and trauma treatment and management in WA.
- Provide advice and support in the development of policies that support integration of services through partnerships and collaborations across organisations and government service providers.
- Advise on appropriate evidenced-based standards of care including benchmarks, accreditation and credentialing.
- Advise on workforce needs and the education and training required by clinicians and other relevant professions and the community.
- Advise on the development of injury surveillance and trauma research data systems to inform planning, policy and strategy.
- Ensure the production of an annual report that is made available to the public.

In keeping with several of the responsibilities it was decided that a web based directory of WA Trauma Education opportunities would be a useful tool for those interested in or responsible for facilitating professional development.

To this end the community supported by the WA Trauma Education Committee (WATEC), a sub-group of the Injury and Trauma Health Network, conducted a WA Trauma Education Audit which informed this directory, now known as the:

Injury & Trauma - Prevention, Management and Rehabilitation Courses for WA Health Practitioners Audit Report.

This document **Part B: Treatment Courses** is only a portion of the entire directory.

The report is available in full or as sub sections on the Injury and Trauma Health Network website

http://www.healthnetworks.health.wa.gov.au/projects/trauma_education.cfm

The other sections available as separate documents are:

Part A: Prevention Courses

Part C: Rehabilitation Courses

Invitation to all interested providers

The audit in full and this section 'Prevention courses' is by no means an exhaustive list of all available trauma education. However, it does provide direction to a wide variety of professional development opportunities available to West Australians. If you would like to have your organisations education courses considered for possible inclusion in the audit as part of an annual update simply submit the details, including a contact persons phone number or email address to

healthpolicy@health.wa.gov.au; attention Injury and Trauma Health Network Development Officer, Trauma Education Directory.

Australian Red Cross **Advanced Resuscitation**

Website: <http://www.redcross.org.au>

<p>Target Audience Course in First Aid (Basic CPR) 69938 (CPR).</p>	<p>Content This Advanced Resuscitation course is designed to teach the knowledge and skills necessary to maintain breathing and circulation in an adult, child or infant using various mechanical aids and supplemental oxygen. On successful completion of this course participants will be issued with a Statement of Attainment for the nationally recognised unit of competency from the Health Training Package, HLTF404A - Apply Advanced Resuscitation Techniques.</p>	<p>Contacts On Line</p>
--	--	------------------------------------

Australian Red Cross **Basic First Aid (Workplace Level 1)**

Website: <http://www.redcross.org.au>

<p>Target Audience There are no prerequisites for this course.</p>	<p>Content Provides first aider with the knowledge and skills to carry out emergency first aid for life threatening injuries and illnesses, as well as to provide first aid care for injuries and illnesses in the home and workplace.</p>	<p>Contacts On Line</p>
---	---	------------------------------------

Australian Red Cross **Cardiopulmonary Resuscitation**

Website: <http://www.redcross.org.au>

<p>Target Audience There are no prerequisites for this course.</p>	<p>Content This Cardiopulmonary Resuscitation (CPR) course is designed to teach the knowledge and skills necessary to maintain breathing and circulation in an adult, child or infant following cardiac arrest. Content is based on Australian Resuscitation council 2006 guidelines. On successful completion of this course participants will be issued with a Statement of Attainment for the nationally recognised unit of competency from the Health Training Package, HLTCP201A - Perform CPR.</p>	<p>Contacts On Line</p>
---	---	------------------------------------

Australian Red Cross **Cardiopulmonary Resuscitation Refresher**

Website: <http://www.redcross.org.au>

<p>Target Audience</p> <p>The prerequisite for this course is current CPR Statement of Attainment (within last 12 months). You must present evidence of a current CPR Statement of Attainment either prior to, or on the day of your course.</p>	<p>Content</p> <p>The course allows the first aider to update the knowledge and skills gained (within the previous 12 months).</p>	<p>Contacts</p> <p>On Line</p>
---	---	---------------------------------------

Australian Red Cross **Emergency First Aid for Parents & Carers**

Website: <http://www.redcross.org.au>

<p>Target Audience</p> <p>There are no prerequisites for this course.</p>	<p>Content</p> <p>This course provides participant with knowledge and skill to carry out emergency first aid for life threatening injuries and illnesses involving infants and young children. It is designed for childcare workers as well as parents, grandparents and other caregivers.</p> <p>Statement of Attainment for the national recognised unit of competency from the Health Training Package - update every 3 years from the issue date.</p>	<p>Contacts</p> <p>On Line</p>
--	--	---------------------------------------

Australian Red Cross **Senior First Aid (Workplace L2)**

Website: <http://www.redcross.org.au>

<p>Target Audience</p> <p>There are no prerequisites for this course.</p>	<p>Content</p> <p>This course teaches the fundamental principles, knowledge and skills to enable the first aider to provide emergency care for injuries and illnesses, in the home or the workplace. On successful completion of this course participants will be issued with a Statement of Attainment for the nationally recognised unit of competency from the Health Training Package, HLTF301B - Apply First Aid. This course includes CPR.</p>	<p>Contacts</p> <p>On Line</p>
--	---	---------------------------------------

Australian Red Cross **Senior First Aid Refresher (Workplace L2)**

Website: <http://www.redcross.org.au>

<p>Target Audience</p> <p>A current Senior First Aid Certificate/Workplace level 2 is a prerequisite for this course.</p>	<p>Content</p> <p>The course allows the <u>first aider</u> to update the knowledge and skills gained (within the previous 3 years) and revise first aid procedures. Participants will be updated on changes since their previous Workplace 2 or Senior First Aid Course.</p> <p>Current industry standard is for this course to be updated every 3 years with the CPR component being updated every 12 months.</p>	<p>Contacts</p> <p>On Line</p>

Council of Remote Area Nurses of Australia (CRANA) **Maternity Emergency Care (MEC)**

Website: <http://www.crana.org.au>

<p>Target Audience</p> <p>Registered Nurses, Enrolled Nurses, Aboriginal Health Workers, Torres Strait Islander Health Workers, Paramedics and isolated General Practitioners practicing in isolated circumstances without the resources and assistance of formal or regular obstetric and midwifery services.</p>	<p>Content</p> <p>This course was developed in consultation with the Australian College of Midwives & remote and rural health practitioners, following an identified need for a short course that specifically targeted <u>maternity emergency care</u> for non midwives working in a remote or isolated setting.</p>	<p>Contacts</p> <p>On line</p>
---	---	---------------------------------------

Council of Remote Area Nurses of Australia (CRANA) **Remote Emergency Care (REC)**

Website: <http://www.crana.org.au>

<p>Target Audience</p> <p>Registered nurses, Enrolled Nurses, Aboriginal Health Workers, Torres Strait Islander Health Workers, Ambulance Officers and isolated practice General Practitioners. Undergraduate students are not eligible for this course.</p>	<p>Content</p> <p>To enable health practitioners to develop knowledge and skills essential to provide emergency care and treatment in common emergency situations encountered in the remote setting. To provide the <u>remote and rural</u> practitioners with knowledge to promote confidence to deliver safe and quality care to the patient.</p>	<p>Contacts</p> <p>On line</p>
<p>Department of Health WA Bombs, Blasts and Bullets</p> <p>Website: http://www.health.wa.gov.au/disaster</p>		
<p>Target Audience</p> <p>Middle managers, medical and senior nursing staff from across the health sector and other emergency responders are encouraged to apply.</p>	<p>Content</p> <p>The course is aimed at providing participants with the <u>base knowledge and skills to respond</u> effectively to such events by reviewing the risk as well as looking at the clinical management of casualties with injuries resulting from these events.</p>	<p>Contacts</p> <p>On Line</p>

Department of Health WA **Disaster Management – A health Focus (3 days)**

Website: <http://www.health.wa.gov.au/disaster>

Target Audience	Content	Contacts
<p>The course is designed for middle-level managers and senior clinicians across the health sector.</p>	<p>The course aims to provide participants with an <u>overview of prevention, response and mitigation of the effects of disasters</u>. The content includes:</p> <ul style="list-style-type: none"> ■ Emergency and Risk Management ■ WA Emergency Management Arrangements ■ Role of SJA and RFDS ■ Pre-hospital triage ■ National Registration & Inquiry System (NRIS) ■ Hospital trauma management systems ■ Displaced communities and recovery ■ Public Health ■ Psychological Aspects of Disasters and Mental Health Initiatives ■ Role of the Media ■ Health aspects of CBR <p>The course concludes with an Emergotrain exercise to give participants to opportunity to reinforce the course concepts.</p>	<p>On Line</p>

Department of Health WA **Disaster Management E-Learning Package**

Website: <http://www.health.wa.gov.au/disaster>

<p>Target Audience</p> <p>Any health service staff and other emergency response organisations who would like to develop their awareness of the health aspects of emergency management.</p>	<p>Content</p> <p>The course introduces users to emergency management principles and arrangements within a health context. There are 2 versions available, Basic version (4 modules) and an Intermediate version (7 modules).</p> <p>Basic Version covers:</p> <ul style="list-style-type: none"> ■ Introduction ■ Responding to the emergency ■ Risk Management ■ Public Health ■ Intermediate version covers the above and also: <ul style="list-style-type: none"> ■ WA emergency management arrangements ■ Preparing the health facility ■ WA and metropolitan health arrangements 	<p>Contacts</p> <p>On Line</p>
---	--	---------------------------------------

Department of Health WA **Emergotrain Senior and Assistant Instructor Courses**

Website: <http://www.health.wa.gov.au/disaster>

<p>Target Audience</p> <p>WA Health, Private Hospitals and approved contractors who wish to test their disaster system response (ability to decant, activate plans, receive a large number of casualties, triage and treat as required) or educate staff in disaster response.</p>	<p>Content</p> <p>Developed in Sweden, the Emergotrain System uses whiteboards and magnetic symbols to simulate resources and patients from a disaster site.</p>	<p>Contacts</p> <p>On Line</p>
---	---	---------------------------------------

<p>Department of Health WA Health Aspects of CBR (2 days) Website: http://www.health.wa.gov.au/disaster</p>		
<p>Target Audience Medical and health personnel (doctors, nurses, paramedics) who may be involved in providing medical support in response to a deliberate CBR incident.</p>	<p>Content The course aims to provide health and associated emergency response partners with an understanding of the health aspects of CBR incidents. It will provide participants with access to subject matter experts so as to develop their awareness of the CBR threat in Australia, understand the arrangements in place for a health response, learn to recognise the characteristics of those affected by CBR agents, and medical treatment for chemical, biological, and radiological agents, including toxic industrial chemicals.</p>	<p>Contacts On Line</p>
<p>Department of Health WA Major Incident Medical Management Courses (MIMMS) Team Member (2 days) Advanced (3 Days) Website: http://www.health.wa.gov.au/disaster</p>		
<p>Target Audience The courses are open to all registered medical practitioners, registered nurses, paramedics and ambulance officers. Those who work in the fields of disaster medicine/nursing, pre-hospital care and emergency response will find the courses useful.</p>	<p>Content The Major Incident Medical Management and Support (MIMMS) courses teach a systematic approach to disaster medical management that can be applied to any major incident. Advanced Course: The content includes command safety, communication, assessment, triage, treatment and transport, through: structured lectures, a series of table-top exercises, practical exercises in radio communication, casualty simulation triage exercises, workshops, field exercises for command training involving airport and large crowd incidents (sports or similar) Team Member Course: This course takes the key aspects of the Advanced course, which are relevant for those members of a response team, who will have a more hands on role rather than a commander or coordination role.</p>	<p>Contacts On Line</p>

Department of Health WA **Regional Training (3 days)**

Website: <http://www.health.wa.gov.au/disaster>

<p>Target Audience</p> <p>Regional Health staff and representatives from other organisations likely to be involved in Disaster Response eg FESA, SJA, WAPOL, Local Government, GPs etc.</p>	<p>Content</p> <p>This course aims to provide participants with the knowledge and skills to respond to a major incident. Speakers, including representatives from Dept of Health, WAPOL, FESA and St John Ambulance, address issues of risk management, existing emergency management arrangements for Health and regional areas, public health issues, preparing the hospital, triage, displaced communities and recovery after a disaster. This course concludes with an EmergoTrain exercise, which looks at practicing elements of the region's health emergency plan.</p>	<p>Contacts</p> <p>On Line</p>

Target Audience	Content	Contacts
<p>The target audience for the ELS course is any doctor who manages medical emergencies without the benefit of immediate on site specialist backup. This will include: Rural General Practitioners, Hospital Salaried Medical Officers Registrars</p>	<p>A 2-day course teaching a systematic approach to the emergency management of any seriously ill patient. The course consists of an intensive program of lectures, skill stations, and interactive group discussions.</p> <p>Each course is limited to 21 participants.</p> <p>There are 8 skill stations with 3 participants per instructor.</p>	<p>On line</p>

Fremantle Hospital **Advanced Life Support**

Website: <http://www.fhhs.health.wa.gov.au>

Target Audience	Content	Contacts
Resuscitation and Medical Emergency Team members, Medical and Nursing staff working in critical care areas, Operating Room, Anaesthesia and Recovery, or remote and rural areas, Paramedics.	This two day Australian Resuscitation Council (ARC) and Resuscitation Council (UK) co-badged course aims to teach senior members of the multi-disciplinary team the theory and practical skills to effectively manage cardio-respiratory arrest, peri-arrest situations and special circumstances.	On line

Fremantle Hospital **Paediatric Life Support**

Website: <http://www.fhhs.health.wa.gov.au>

Target Audience	Content	Contacts
Nursing and Medical practitioners who wish to update their knowledge and skills in the management of the severely ill or injured child.	<p>This one day course focuses on a systematic approach for the first ten minutes of management of the seriously ill/injured child as per Advanced Paediatric Life Support Australia and New Zealand. Pre-course reading and multiple choice question paper are distributed prior to the course. The course includes:</p> <ul style="list-style-type: none"> ■ Recognition of the seriously ill child ■ Paediatric basic life support ■ Airway management ■ Intraosseous access ■ Rhythm recognition and defibrillation ■ Initial assessment & management of the seriously injured child ■ Simulated resuscitation scenarios 	On line

MOET Australia & New Zealand – Managing Obstetric Emergencies and Trauma (MOET)

Website: <http://www.moetaustralia.com.au/>

Target Audience	Content	Contacts
<p>All candidates on the MOET course must be from a medical background, either in obstetrics, GP obstetrics, anaesthetics, GP anaesthetics, emergency medicine or intensive care. The course is aimed at a specialist level, but senior registrars in obstetrics and gynaecology or anaesthetics are eligible, provided they are year 5 or above and have passed the RANZCOG or ANZCA membership examination. General practitioners need to have RACGP or equivalent and be regularly involved in the provision GP obstetrics and/or GP anaesthetic services.</p>	<p>The MOET course runs for two and a half days and covers trauma (first day), obstetrics (second day) and examinations (final half-day). The format for teaching consists of a comprehensive package of didactic teaching, scenarios, skills drills, small group workshops, demonstrations and moulages to teach and reinforce knowledge and skills acquired by the candidates. There is continuous assessment of skills during the course, as well as an MCQ and OSCE exam on the final day.</p> <p>The MOET course builds on core skills and knowledge expected of a senior clinician. There is currently no comparable course in Australia. It is more advanced than the ALSO course, however the two courses may complement. The PROMPT course has some features that may also complement MOET in terms communication, teamwork and emergency management systems within individual maternity units, but does not attain the peak levels of achievement for individuals.</p> <p>MOET commenced in Australia in 2009, starting with two courses and one instructor course in Sydney in November. We plan to run four to five courses per year in Australia and New Zealand, as well as at least one instructor course. Where possible we try to link courses with national and international scientific meetings and symposia.</p>	<p>On line: http://www.moetaustralia.com.au/moet-courses-2012-online-application-1</p>

Queensland Government **Pre Hospital Trauma Life Support (PHTLS)**

Website: <http://www.sdc.qld.edu.au>

Target Audience	Content	Contacts
<p>Health care providers should have clinical experience in either emergency or critical care in the immediate hospital setting or pre hospital.</p> <p>All participants should have general first aid knowledge and an understanding of emergency care terminology and familiarity with standard emergency equipment.</p>	<p>The PHTLS course is a unique two-day multidisciplinary continuing education program designed to increase knowledge and skills in delivering critical care in front line pre-hospital trauma care and the handling of trauma patients.</p> <p>PHTLS teaches students to deal with trauma where there may be some delay in transferring the patient to a healthcare facility.</p> <p>The PHTLS Course provides the participant with the fundamental awareness that while definitive care cannot be provided for the critically injured trauma patient in the field, the continuum of care begins at the scene with competent pre-hospital trauma management.</p> <p>Participants are required to participate in the full 2 days / 17 hours to achieve a Certificate of Attendance.</p> <p>To successfully complete the course and receive the NAEMT Advanced Provider Accreditation, participants must complete the written multiple-choice examination with a mark of 76% or greater and successfully complete four skill stations.</p>	<p>On line</p>

Royal Australasian College of Surgeons **Early Management of Severe Trauma Course (EMST) adapted from the Advanced Trauma Life Support (ATLS) Course**

Website: <http://www.surgeons.org>

<p>Target Audience</p> <p>It is designed for all doctors who are involved in the early treatment of serious injuries in urban or rural areas, whether or not sophisticated emergency facilities are available: surgeons, emergency physicians, rural GPs, anaesthetists, intensivists, medical officers in the Armed Forces, trainees in the above specialties.</p>	<p>Content</p> <p>A two and half day intensive course in the management of injury victims in the first 1–2 hours following injury.</p> <p>Adapted from the Advanced Trauma Life Support (ATLS®) course of the American College of Surgeons in 1988.</p> <p>Emphasis on life saving skills and systematic clinical approach.</p>	<p>Contacts</p> <p>On line</p>
--	--	---------------------------------------

Royal Australian College of General Practitioners (RACGP) **Clinical Emergency Management Programme – Intermediate Workshop**

Website: <http://www.racgp.org.au/cem>

<p>Target Audience</p> <p>Designed for registered medical practitioners, practice managers, practice nurses, general practice registrars and International Medical Graduates (IMGs).</p>	<p>Content</p> <p>The Clinical Emergency Management™ Program (CEMP) Intermediate workshops have been designed to build participants' knowledge, skills and confidence when responding to medical emergencies. This workshop includes CPR practice and assessment, which meets the 2008–2010 triennium basic CPR course requirements. It also meets the basic life support (BLS) and Advanced life support (ALS) training requirement for general practice registrars. Assessment of BLS and ALS skills can be arranged on request. A national team of highly trained intensive care paramedics facilitates these workshops.</p>	<p>Contacts</p> <p>On line</p>
---	--	---------------------------------------

Royal Australian College of General Practitioners (RACGP) **Clinical Emergency Management Programme – Advanced Workshop**

Website: <http://www.racgp.org.au/cem/advanced>

Target Audience

To be eligible to register for a CEMP Advanced workshop, participants must have completed either a CEMP Intermediate workshop (formerly Emergency Life Support Skills), or an ACLS, ALS, APLS, ELS, EMST, ILS or REST course within the past 4 years. Participants who have attended non-RACGP prerequisite courses are required to submit a certificate of attendance when faxing their registration form to confirm that participation has occurred within the past 4 years.

Content

The Clinical Emergency Management™ Program (CEMP) Advanced workshops have been designed to further build participants' knowledge, skills and confidence when responding to medical emergencies. A national team of highly trained intensive care paramedics facilitates these workshops. This workshop has been designed by GPs for GPs in direct response to feedback requesting an additional intensive workshop focusing on advanced adult resuscitation and paediatric emergencies.

Royal Perth Hospital (RPH) **The Master of Clinical Nursing (Emergency)**

Website: <http://www.rph.wa.gov.au>

<p>Target Audience Registered Nurses</p>	<p>Content A collaborative program between Royal Perth Hospital and the School of Nursing, Midwifery and Postgraduate Medicine at Curtin University of Technology. The course is designed to provide the foundations of nursing science, together with the clinical knowledge and skills required to develop specialist practice. A significant component of the course is conducted in a health care institution. It focuses on the development of clinical leadership, promotion and integration of evidence-based nursing practice to foster the development of graduates consistent with the profile of the nurse specialist, offering the advanced level nurse further clinical skills and an opportunity to extend career options. It also provides the foundation for professional doctoral studies. Students may exit the program at the certificate, and diploma level.</p>	<p>Contacts Please email 'RPH.ResusTraining@health.wa.gov.au' or contact the RPH Education Centre directly on 9224 2498 or on 9224 2244 (via hospital switchboard)</p>
